

JOE BOYLSON

FULL STACK DEVELOPER

SUMMARY

I am a creative and technical web developer with over two years experience in building a variety of applications and systems. With my passion for web technologies, proficiency in problem solving, attention to detail, and an eye for design and aesthetics, I offer skills in creating efficient and modular web solutions, crafting positive and effective user experiences, and an enthusiasm to collaborate and work towards optimal solutions.

EXPERIENCE

Full Stack Developer — Kinetic Vision [04.19 — present]

- Responsible for the development and maintenance of a small set of applications used by Engineers and Business Professionals
- Improved Python-based analytics system that provides valuable information to Robotic Engineers

Full Stack Developer — IT Solutions Center [01.18 — 04.19]

- Responsible for the development and maintenance of an enterprise web system used by over 20,000 users
- Developed import and export data processes that streamlined onboarding and integration into the system

NOTABLE PROJECTS

Headspace — Kinetic Vision [06.19 — 09.19]

- Collaborated with Engineering teams to develop a web controller for a microcomputer
- Streamlined microcomputer imaging and startup to quickly prepare and update devices for use in the field
- Focused on reusable and modular web technologies to future-proof the system

Matt Boylson's Portfolio — mattboylson.com [10.19 — 01.20]

- Worked closely with a designer to develop his personal web portfolio
- Implemented simple, modular, and reusable components to allow client to update the site with new content at any time

Personal Portfolio — joeboylson.us [01.18 — present]

- An ongoing personal platform to showcase my personal projects and any web technologies that interest me
- Aimed to utilize design and development best practices and strategies
